Application

ÖLFLEX® CHAIN 90 P are highly-flexible PUR single core cables approved for the European, North American and Canadian market, for permanent flexible use in power chains and fixed installation with narrow bending radii under increased mechanical load conditions. They are also suitable for use in dry, damp or wet areas. These products are suitable for outdoor use if the indicated temperature range is observed.
ÖLFLEX® CHAIN 90 P are increased resistant to oils and at room temperature largely resistant to acids and alkalis.
The outer sheath withstands high mechanical stresses, in particular abrasion and dragging. It is also cut proof and resists microbes and hydrolysis.
ÖLFLEX® CHAIN 90 P are especially suitable for increased requirements (Extended Line) in power chains and in permanently moved machine parts. They are suitable for linear, automated movements. The maximum tensile load is 15 N/mm2 of conductor cross-section during installation and operation. Compulsory guidance is not permitted.

Application range:
Power chains or moving machine parts, for wiring of electric and electronic equipment in switch cabinets, test systems in the automotive industry, vehicles and stationary fuel cell systems

USE acc. to RU: PUR sheathed cables for external wiring
USE acc. to cRU: Cables for internal or external interconnection with or without mechanical use.
