## 1. APPLICATION

ÖLFLEX<sup>®</sup> 190 is a multi-conductor cable with a highly oil-, coolant-, and solvent-resistant jacket for control and power applications in an industrial environment. It is designed for use in all electrical equipment under dry, damp and wet conditions. ÖLFLEX<sup>®</sup> 190 is also UL TC approved so it can be routed in tray as well. ÖLFLEX<sup>®</sup> 190 CY is a shielded version for EMI and RFI protection.

### Applications:

CNC machining centers, grinding machines, bottling equipment, conveyors, processing equipment, assembly lines, control panels and can substitute for anywhere that industrial equipment cables are used.

### Underwriters Laboratories

For Tray use in exposed run applications, Wind Turbines, Machine Tools etc. and internal or external wiring of electrical and electronic equipment.

### Canadian Standards

For Appliance Wiring Material and internal or external wiring of electrical and electronic equipment applications.
